SUMMARY:

I have a great desire and motivation to start a new role in Testing industry. Thanks to technical education and past experience, I have the skills of being meticulous and inquisitive. Creating diffrent types of tests are not a problem.

I am good at multi-tasking as well as when it comes to time management skills.

I'm fond of New technologies and mountain biking, I take part in amateur competitions, reaching my goals despite any difficulties. I like learning new things and developing my skills, both personal and professional.
